

3D Free Standing Lace Rose

Having Fun with FSL

These are done in Pfaff Creative Designer Software
The full designs were made on the Pfaff 120mm x 115mm
Total Designs 6

Design's are Free Standing Lace when done as directed

I used 2 layers of Vilene,

<http://www.discountembroiderysupply.com> Bought from Discount Embroidery

number 12 schmetz universal needle,

40 weight Madeira Rayon thread on top and a fine bobbin thread.

I used a prewound from

<http://www.brothermall2.com/> Coats Spun Polyester Astra "L" Bobbins 18.95 a gross

or serger cone thread from Wal-Mart for manual bobbin winding

I rinsed the vilene out holding each design under warm water a few seconds only,

Also tested with H2O Gone From Wal-mart - Not tested with any other stabilizer

I used Aleen's Original Tacky Glue to glue the rose together

First sew out the number of petals you want.

I keep petal numbers to an odd number.

on this rose I used 9 petals, 3 small, 3 medium and 3 large

I used 5 leaves.

the number of petals to use will depend on the size of finished rose you want

few will make a bud. several a huge rose

So experiment and just have fun

**once all
sewn out
rinse gently
for a few
seconds,
until the
stabilizer
does not
show**

**Now lay out
each petal
shaping and
pinning it
on
styrofoam
I put my
finger
under the
petal to get
a curve,
then rolled
the tip back**

**when the leaves
were rinsed**

**they curled a bit
on their own
and I pinned
them to the
styrofoam as
they were**

**Now lets start to glue this baby together,
take the smallest petal and wrap it and glue
as shown
the glue will have to be tacky to hold. DO not
rush this, Take your time**

**I put glue on all the petals before I started
that way the glue was tacky when I got to the
next petal
Take petal 2 and wrap it around petal 1**

**Now add petal 3 and so on always overlapping by about 1/3 of the petal.
Doing tighter makes a more bud like rose,
further makes a open rose**

**Just keep wrapping till all are glued in place
Let dry thoroughly**

**Rose done, I pinned back on
the styrofoam,
and sprayed with a bit of
water mist
and shaped a bit more to my
liking
Let dry thoroughly**

**Now time to
glue the
leaves on.
I started
with 3 2
small and a
large**

**then I added
one medium
and one small**

**The end.
Rose is done
Now use
your
imagination
and have
some fun
making
some
bouquets**

**Here is a long stemmed rose Sharon made
She has a lesson for digitizing the rose on her site
